

# What makes tevixMD superior?

Patented search algorithms is primarily what sets tevixMD apart when it comes to patient data accuracy, and data accuracy impacts revenues and operational efficiencies at nearly every point in your workflow

## Unmatched Data Accuracy

Our patented search algorithms allow us to consistently deliver 90-95% data accuracy, far above the standard industry average of 60-70% you'll find elsewhere.

All this with only a name and zip code or DOB!

## Real-Time Data Precision

All data is accurate, **real time** - at the time of delivery - including current remaining deductible, co-pay and out-of-pocket status.

We don't rely on stale databases, tevixMD performs a fresh search of over 3 billion records with every search request.

## Quick & Easy Startup and Rapid ROI

See a substantial ROI almost immediately.

tevixMD requires no hardware or software purchases, no big system overhauls and no or nearly no IT involvement.

## Seamless Integration

All services fit seamlessly into your workflow and are available in a single browser window or embeded within your order entry system.

## On-Demand Availability

All data is available on demand, not later today or tomorrow, and all from one single window - no need to switch applications. There is no waiting and data responses are delivered to your screen in seconds.
